Shared Reading: Module 2 Unit 1 Lesson 11	Vocabulary: Global warming is a two-word noun that means the dangerous increase in the world's temperature. Scientists help us identify actions we can take to slow <i>global warming</i> .	Vocabulary Weathering is a noun that means the gradual breakdown of rocks because of weather. <i>Weathering</i> often changes the color of rocks.	Vocabulary: Particles is a plural noun that means a portion of a substance. <i>Particle</i> s are generally small, but they vary in size. Word Study: Use each word in a sentence. Make sure you can spell your words correctly.	Shared Reading: Module 2 Unit 1 Lesson 15
Igneous rocks, sedimentary rocks and metamorphic rocks Types of Rocks Metamorphic: Rocks that have been changed over time due to heat and pressure. Sedimentary: Rocks that are made up of different layers due to continuous pressure of different kinds of rocks and sediments. Igneous: Rocks that are formed when magma cools and solidifies.
