<b>Words Their Way</b>  Students read in  Epic - What is a  Biome?  Author: Bobbie Kalman  Define and draw aquatic and terrestrial biomes.  9:45 - 10:15 -  Read to self	<i>Predators, such as lions, cheetahs, leopards, and hyenas, hunt savanna herbivores.</i> <i>Grassland Biome: Grasses</i> grow in wide, open spaces around the world. Large areas covered with grasses are called grasslands. Tropical grasslands grow close to the <b>Equator</b> . Temperate grasslands grow in regions farther from the Equator.	Wetlands are places where the ground is often covered with shallow water, making them different from dry land. They are home to many plants, animals and insects, which makes them vital for biodiversity.  Facts About Wetlands  Wetlands are typically low-lying areas They can be natural or man-made They can be coastal or inland Floodplains, swamps, marshes, mangroves deltas and lakes are some types of wetlands. A paddy farm is also a wetland Wetlands can contain fresh water, salt water, or brackish (a combination of the two)	A tundra is a cold, treeless area where the ground is often frozen. They are known for being cold and dry. Unscramble: <i>on it / the tundra / and throwing garbage / over it / by driving / people damage</i> <i>People damage the tundra by driving over it and throwing garbage on it.</i> Tundra crossword from TPT.	<b>Spelling Test Minerals and Rocks</b> <b>Guided; using a graphic organizer, write an informational paragraph about minerals and rocks.</b>
